DETAILED ACTION

Response to Amendment

The amendment filed on 4/28/03 has been considered. Applicant's arguments are deemed to be persuasive-in-part.

Claims 16-27 are pending.

The rejections under 35 USC 102(a) are withdrawn in view of applicant's arguments.

Response to Arguments

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-27 remain rejected under 35 U.S.C. 102(e) as being anticipated by Ring US 6054561. The reasons for this rejection are of record in paper no. 20, mailed 1/22/03.

Art Unit: 1642

Applicant argues that the Ring patent teaches a 200 kDa antigen. The Ring patent discloses antigens ranging from 40-200 kDa and this reads on applicant's range. (see abstract).

Applicant argues that the patent does not teach that the product is detectable by OD-3, NB-1 or TA-1. Absent evidence to the contrary, it is inherent that the product in the reference is detectable by OD-3, NB-1 or TA-1.

Claims 25-27 remain rejected under 35 U.S.C. 102(e) as being anticipated by Hudziak et al US 5720937 or 5772997. The reasons for this rejection are of record in paper no. 20, mailed 1/22/03.

Applicant argues that the patent does not teach that the product is detectable by OD-3, NB-1 or TA-1. Absent evidence to the contrary, it is inherent that the product in the reference is detectable by OD-3, NB-1 or TA-1.

Allowable Subject Matter

Claims 16-24 remain allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1642

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
